

2025年贵州贵阳初三中考一模英语试卷

一、选词填空

1. 阅读下面短文，从框内七个选项中选出可以填入空白处的最佳选项。选项中有一项为多余选项。

A. to B. on C. a D. by E. because F.
or G. over

People around the UK came together to welcome Chinese Spring Festival. It began _____ 1 _____ January 29th. 2025 marks the Year of the Snake. Many Asian communities led public celebrations around the UK.

Thousands of people went to London's Chinatown _____ 2 _____ watch performances, such as dragon and lion dances.

London's mayor said, "These activities played an important role in making London _____ 3 _____ lively city." The celebration had attracted _____ 4 _____ 500,000 people.

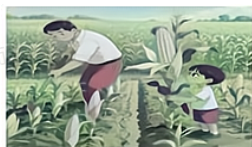

Liverpool was decorated (装饰) with red lanterns. Celebrations here included live music and fireworks. And buildings were lit up in red. A wildflower garden was decorated with more than 1,000 flowers made _____ 5 _____ children.

In Wales, activities included lion dances and a display of a 15-metre green snake model.

A Chinese Association leader told ITV news, "Spring Festival is a children's day _____ 6 _____ they can get lots of presents, food and lucky money." Maybe that's why so many kids are crazy about the festival.

二、完形填空

2. 阅读下面短文，从每题所给的A、B、C三个选项中选出可以填入空白处的最佳选项。

In a small town, a young boy was laughed at for being a farmer's son. The boy returned home from school, feeling _____ with tears. He told his father what happened. The father _____ carefully and didn't say anything at first. Then he took his son to their fields. The father _____ two plots (块) of land and said, "Son, let's do a small experiment. We will each grow corn on one plot. I will water my corn with _____ water and you will use dirty water. Let's see what happens by the harvest season."

Months later, the corn on both plots grew very well. But the son's corn was much taller and more fruitful. The son was _____ and asked, "Dad, why is my corn better than yours even though I use dirty water? That seems impossible." The father _____ and answered, "Dirty water doesn't stop the corn from growing. It works as organic fertilizer (肥料) and helps your corn grow stronger. This is because new challenges bring new _____."

After this experience, the young boy became happy again. In the following days, he could _____ face his classmates' hurtful words. Whenever he met difficulties, he would _____ what his father said. People might laugh at your background, but what really matters is how you deal with it. You should make use of your own chances to _____ your own new world. Just like the corn, it can still grow strong even if it's watered with the dirtiest water.

7.

A. sad
B. tired

- A. Mrs Brown can offer help.
- B. Mrs Brown feels worried.
- C. Mrs Brown needs some help.

19. Where can we probably read Text 2?

- A. On the street.
- B. At a school.
- C. In a park.

20. What is Text 3 saying?

- A. Someone is looking for a dog.
- B. Someone's dog needs training.
- C. Someone wants to keep a dog.

4. Nature can be beautiful, but it can also be dangerous. Take wildfires for example, more and more wildfires have been burning recently, causing great damage (损害).

Natural causes like lightning and hot sun have caused wildfires, but four out of five wildfires are started by humans.

Once a wildfire starts, it burns anything in its path such as trees, bushes and even buildings. Dry weather and high winds help wildfires spread, and they can move very quickly, up to 23 km an hour.

So, what should you do to prevent a wildfire? First, always be careful around fire. Follow fire safety rules in parks and public areas, especially when camping. And if you do make a fire outdoors, be sure that you put it out completely. Even if you're careful, you should be prepared for a wildfire. If one starts in your area, check TV, radio and emergency alerts (警报) to learn what to do. Pay attention to the fire and communicate with emergency workers. Always follow their instructions.

Wildfires can be scary, but did you know they can actually help a forest? The fire kills sick plants and harmful insects that have been living in the forest's ecosystem. Certain animals do better in the burnt-out living places that fires create. And by burning trees and their leaves, wildfires allow sunlight to reach the forest floor, so light can reach seedlings and help them grow into new plants. Wildfires are dangerous and can cause a lot of damage. But they are also a part of the natural world, and they can be healthy for a forest. So, we can't simply view them as destruction (破坏), but also as nature making room for new beginnings.

21. What can we know about wildfires?

A. They often move at a speed of 23km/h.

B. Four fifths of them are started by humans.

C. They cannot be healthy for the forest.

22. What does paragraph 3 mainly talk about?

A. Ways to prevent a wildfire.

B. Natural causes of wildfires.

C. Damage that a wildfire brings.

23. What does the underlined word "**they**" in paragraph 4 refer to?

A. Sick plants.

B. Wildfires.

C. Certain animals.

24. Which saying best shows the writer's understanding of wildfires?

A. Better late than never.

B. Every coin has two sides.

C. Think twice before you do.

5. With the rapid development of artificial intelligence (AI), China is using AI and robots in elderly care service field, offering new ways to the challenges of an aging population. The latest data shows that China's population aged 60 and above reached 310 million by the end of 2024. It's about 22 percent of its total.

Although elderly care robots are still in the early stage compared to industrial robots, some users have already begun to experience the convenience they offer. To serve the users better, China helped create the first international standard for elderly care robots, setting rules for their design and safety.

In Shenzhen, elderly care robots are widely used in nursing homes. They play chess, give treatment, and help old people with movement. "These robots improve our lives and show us new ideas," said Li Xipo, a nursing home director. During the Spring Festival, special robots even helped elderly people climb mountains, showing their potential (潜力) in making our lives better.

Other cities are also using elderly care robots. In Shenyang, a patient learned to walk again with the robot's help. In Chengdu, a companion (陪伴) robot named Yang Yang wakes the old each morning and reminds them of their daily activities. Soon, more elderly care robots like Yang Yang will enter the market. They will bring the elderly a better life.

It is believed that the government support and the progress in AI will help the development of the elderly care robots. In the future, the care robots will be able to predict health risks and provide proactive (主动的) care just like family.

25. What does the underlined word "**aging**" in paragraph 1 mean?

A. Growing old.

B. Getting heavy.

C. Becoming rich.

26. How does the writer show the advantages of using elderly care robots?

A. By listing numbers.

B. By giving examples.

C. By asking questions.

27. What can be inferred from the text?

A. 22% of China's population are aged 60 and above.

B. The elderly care robots will become more popular.

C. The government will cut down its spending on robots.

28. What can be the best title for the text?

A. AI Helps China Develop Elderly Care Robots

B. China Creates Elderly Care Robot Standard

C. Smart Robots Help China's Elderly People

6. 阅读下面短文，从短文后选出可以填入空白处的最佳选项。选项中有一项为多余选项。

Preparing for school the night before is very important. Or you may find yourself running around to get everything prepared on time in the morning. _____ 29 _____

Choose right clothes. Waiting until you get out of bed to find what to wear can make your morning more stressful. _____ 30 _____ Then you can dress yourself quickly after you wake up.

Organize your study materials. You don't want to get to the school and realize that you left something you need at home, so you may want to organize your study materials the night before. _____ 31 _____

Take a shower. While a morning shower can help wake you up, it can also take your valuable time before going to school. To give yourself a little more leeway (余地) when you get out of bed, consider taking a shower before bed in the evening.

_____ 32 _____ There are few things worse than being late for school. Set a dedicated (专用的) alarm clock before you go to sleep. And then set a backup (备份) alarm for a few minutes after the first just in case you sleep through the first.

Get a good night's sleep. _____ 33 _____ So it's necessary to get a good night's sleep. Try to keep your room comfortable for sleeping. Relax by keeping your mind off study-related matters for the night, so you can make sure of a good night's sleep.

- A. Set double alarms.
- B. Go to bed early and get up early.
- C. Instead, pick out your clothes the night before.
- D. Here are some things you can do to get prepared.
- E. It's hard to face the day if you aren't well rested.
- F. Doing so will save you from running around next morning.

四、任务型阅读

7. 阅读下面短文，根据其内容填空和回答问题。(1至4每题答案不超过3个词，5题需用完整句子回答。)

Nuclear submarine

核潜艇

Huang Xuhua, chief designer of China's first-generation nuclear submarines, passed away on February 6th, 2025.

Huang was born on March 12th, 1926 to a family of doctors in Guangdong province. After spending his boyhood in wartime, he joined Shanghai Jiao Tong University to study shipbuilding. He received strict academic training. After graduation, Huang started his lifelong career in China's shipbuilding industry. In 1958, Huang was selected to join the research team tasked with designing China's first nuclear-powered submarine.

Huang and his colleagues found the task very challenging at the beginning. None of the researchers had any knowledge in that field. Other countries were extremely protective (保护的) of such technologies. Huang and his colleagues looked for information from newspapers and magazines. "It was extremely difficult to find a little piece of information," a researcher said in 2020.

In the following years, Huang and other top engineers led the research and development for the nation's first-generation nuclear submarines. After years of efforts, China finally built its first nuclear-powered submarine—the first Type 091—in 1970, becoming the fifth nation to have such hardware.

Huang's name was kept as a secret until 1987 when a magazine in Shanghai was allowed to publish a report on him.

Even in his 90s, Huang used to visit his office every weekday to review and sort out materials of his know-how and experience, and would also help young researchers on technical issues.

Due to his outstanding contributions (贡献), Huang was given the Medal of the Republic, China's highest honor, in 2019.

Basic personal information	1958 joined _____ 34 _____ and began to design China's first nuclear-powered submarine	1970 helped China become _____ 35 _____ to have nuclear-powered submarine	
	 Life events		
Pioneer of nuclear submarines — Huang Xuhua ▼ Date of birth: Mar. 12, 1926 ▼ Place of birth: _____ 36 _____ ▼ Graduation university: Shanghai Jiao Tong University	1987 _____ 37 _____ by a magazine in Shanghai	In his 90s kept on working and helping young researchers	2019 was given the Medal of the Republic
	5. What have you learned from Huang's story?		
38			

五、完成句子

8. 贵州位于中国的西南部，这里有许多风景名胜和特色民族文化。

Guizhou is located in the southwest of China. _____ plenty of places of interest and unique ethnic culture.
